

BIBHUTI BHUSAN MOHANTA

+91 8260829676 — mohantababulu368@gmail.com

OBJECTIVE

Electrical Engineering graduate with a strong foundation in electrical machines and power systems, with strong interest in industry. Aiming to enhance technical and problem-solving skills while contributing to organizational goals and delivering efficient, reliable, and sustainable engineering solutions.

EDUCATION

B.Tech Electrical Engineering , Biju Patnaik University of Technology, Rourkela	2022–2026
CHSE (Class XII – Science) , Steel City Science Higher Secondary School, Danagadi, Jajpur	2021–2022
BSE (Class X) , Manapur Highschool, Manapur, Jajpur	2019–2020

SKILLS

Software Tools	NI Multisim, MATLAB, VS Code, MS Office
Core EE	Electrical Machines & Industrial Drives, Power Electronics
Embedded & Programming	C, C++, Java, HTML, IoT Communication

EXPERIENCE

Intern	May 2025 - June 2025
Tata Steel Kalinga Nagar, Jajpur	<i>Kalinga Nagar, Jajpur</i>

- Gained practical exposure in Transmission and Distribution systems, including the operation and maintenance of AIS (Air Insulated Substation) and GIS (Gas Insulated Substation) infrastructure. Developed understanding of substation components, protection systems, switching operations, and safety protocols in high-voltage environments.

Intern	Jan 2026 - ongoing
Sakthi Auto Component Limited, Tirupur	<i>Tirupur, Tamil Nadu</i>

- Ensured adherence to quality standards throughout the manufacturing process by conducting inspections, measurements, and testing to maintain product reliability and compliance. Maintained inspection records, supported corrective and preventive actions, and collaborated with production teams to achieve zero-defect delivery and continuous process improvement.

PROJECT

Smart Meter-Based Intelligent Load Prioritization System. Developed with the integration of IoT and automation technologies for real-time energy monitoring, data communication, and optimized power distribution. Implemented smart metering concepts to enhance energy efficiency, load management, and system reliability. Applied concepts of power systems, smart metering, and distribution network optimization to enhance energy efficiency, system reliability, and operational performance.

CERTIFICATIONS

- Workshop on Electric Vehicles- Biju Patnaik University of Technology, Rourkela.
- BPUT Project Exhibition- Biju Patnaik University of Technology, Rourkela.
